

WorkTime® - A Powerful Computer Monitoring Tool

WorkTime is a powerful computer monitoring tool designed to monitor sites with thousands of workstations. WorkTime records automatically all applications users work with, all documents they open, all WEB pages they access. Monitoring works invisibly to the users and it is very precise: tracking automatically stops for screensaver/keyboard/mouse inactivity times.

Employee Monitoring, Computer Monitoring

WorkTime automates employee monitoring process by recording automatically what employees work on during the working time: what applications they launch, what documents they open, what online activities they perform (accessing web-sites, chatting), if they play any computer games.

Internet Usage Monitoring

WorkTime provides automatic invisible Internet usage monitoring. Using WorkTime you can track all online activities by the employees: accessing web-sites, chatting, reading emails.

App/Doc	Total Time
Microsoft Internet Explorer	42:03:16
Outlook Express	15:22:46
Total Commander	10:28:02
Microsoft Virtual PC 2004	05:05:14

Time tracking for Terminal Services and Citrix

WorkTime tracks computer usage under Microsoft Terminal Services (Remote Desktop Services) and Citrix Server (Citrix XenApp, Citrix MetaFrame Server, Citrix Presentation Server): applications, documents used, web-sites visited.

Monitoring Software Usage

WorkTime provides **the actual** software usage picture.

Software usage monitoring can help your company to minimize software related expenses by identifying workstations that do not require certain expensive licenses as the software is not used or is used very rare.

Reports

- Scheduled reports are available
- Reports help to discover trends that affect productivity: how much time is actually spent working, browsing the Internet or doing other things
- Reports show software usage
- Custom reports can be added

Ordering Information

You can try out our products and technical support free of charge for 30 days before you make a decision regarding your purchase. By making these free evaluations, you can fully test the software and make sure that it does everything you need. When you are ready to buy, we welcome you to <http://www.nestersoft.com/worktime/register.shtml> to order.
